

## ADI-SIZE SOFT TB

### Tallow Base Softener

To make weaver beams for producing woven fabrics of top quality with highest efficiency, good sizing is highly essential Softener for all kinds of yarn.

### Introduction

The rap-breakage originates chiefly from weaver of yarn to be concrete due to the weaver the Yarn becomes fluffy at the surface with resulting environment and breakage. In order to prevent weaver of the yarn, it is necessary to give sufficient fluff binding effect on the yarn, for this purpose due consideration should be given to the adhesive force of the size. The flexibility of the size film, the lubricity at the surface of the yarn sized yarn strength and so on.

### Properties

Therefore, we have humbly come out with a product namely **ADI-SIZE SOFT TB** the paste based on the refined Tallow, Vegetables Facts, Glycerin Solvents, it is an excellent warp sized suitable for Tropical Climates,

**ADI-SIZE SOFT TB** easily emulsified in water and has substantial affinity for water Hence this Product forms Micro emulsion with water which penetrate deep in to the yarn importing Extra strength to yarn at the same time make it more pliable.

NOTE: - The information and data contained herein are based on controlled or lab work. The recommendations are given on Previous experience basis but cannot be extended to cover every possible case. It should be verified and evaluated by The user by testing for the intended conditions of use. AIDA dyes & chemical does not express or imply any Warranty or guarantee. The suitability of the product for the application, intended by buyer of the product

**GULSHAN E IQBAL BLOCK 6, KARACHI**

**ADI-SIZE SOFT TB** also increase the elasticity thereby the tensile strength is attained. All the protruding fibers are bound firmly to the core of the yarn, rendering the yarn to be useful.

## **Desizing**

---

Desizing of this compound is relatively easy. Standard enzyme technique can be followed for complete removal.
